

# Ezekwu Jeremiah

Mid-level Frontend Developer

## Summary

Detail oriented frontend developer with 3 years working experience with several software engineering tools. Experienced in building scalable and high performance and easily maintainable applications while putting into consideration accessibility. A quick learner with great team collaboration and problem solving skills.

## EXPERIENCE

### **Sweetch pay inc**, delaware, USA— *Frontend intern*

AUGUST - November 2022

Sweetch pay is a company that is dedicated to making P2P crypto payments easy and accessible to everyone

#### *My contributions to the company :*

- Designed beautiful and reusable UI components
- Collaborated with colleagues to refactor code, making it easy to build upon and integrate.
- Designed web pages and provided beneficial IT support and assistance to other employees; performed other duties as assigned by managers.
- Pro-actively participated in weekly team meetings and conducted reports on the projects' progress.

### **Truck Dispatch**, lagos, Nigeria — *Frontend developer*

January 2023 - January 2024

#### *My contributions to the company :*

- Helped in building reusable components that were utilized throughout the application
- Made changes to ensure that components are built to the standards of the design.
- Built the authentication flow to make onboarding of new users seamless
- Developed a contact-us form where users can directly contact the company without having to sign-up
- Pro-actively participated in weekly team meetings and conducted reports

Enugu, Nigeria 400001

## SKILLS

Proficiency in HTML and CSS

Proficiency in CSS preprocessors (SCSS) and Frameworks (Tailwind)

Understanding of responsive and mobile design

Proficiency in Javascript, typescript React and nextjs

Redux and ContextApi for state management

React Query for efficient data fetching

Understanding of web development process (design, develop, deploy)

Firebase

Framer motion for interactive animations

Git and Github for version-control

## Soft skills

Positive and well-organized, with excellent written and verbal communication abilities. Strong interpersonal skills as well as the ability to operate with little or no supervision required.

on the projects' progress.

- Worked closely with a senior engineer, constantly engaging in peer programming sessions and code reviews with him to ensure that the rules of the code base architecture are met

## **Kodee**, lagos, Nigeria — Lead *Frontend Engineer*

January 2024 - Present

As the only frontend engineer present, I was responsible for establishing the software architecture and selecting the right stack for this project.

### *My contributions to the company :*

- Built the entire frontend in typescript and react, employed careful and precise code styling practises and strict types to ensure the production of a high quality codebase.
- Developed efficient, strictly typed and yet flexible reusable components that increased the speed of development by at least 50%.
- Collaborated with the designer and made necessary changes to the design to improve user experience.
- Developed the landing page with accessibility being the main focus so as to improve SEO and rank high in google searches.
- Pro-actively participated in weekly team meetings and conducted reports on the projects' progress.
- Improved the speed and performance of the application by implementing optimization techniques when building.

## **PROJECTS**

### **CoinTrackk** — Frontend, *react.js*

Cointrackk is an application where you can track prices and other of certain cryptocurrencies and read relative news about them

#### *What i did while building this project;*

- Designed interactive and reusable UI components with react.js
- Utilized contextApi and reducers for state management
- Utilized multiple api's to fetch real-time cryptocurrency data and news
- Utilized apexChartJs to display data

Link : <https://coin-trackk.netlify.app/>

## Home Hub— FullStack, *react.js*, *Firebase*

A real-estate web-app where you could see houses up for sale and rent. You could also contact landlords in regard to their listings. Registration to the website grants you access to be a host

*What i did building this project ;*

- Designed interactive and reusable UI components
- Utilized firebase to handle the backend and store necessary data authentication e.t.c
